1. Executive Summary

Key observation: Asset Parts 3/4/5 collapsed in lockstep (32.9% / 24.6% / 21.1% pass rates) — that pattern indicates a single shared page-object regression after the May 2026 web update. One targeted locator fix could recover ~160 tests.

Strong modules: SLD (98.6%), Work Order + Issue (94.9%), Dashboard + BugHunt (91.8%) including the 17 new module smokes added 2026-05-25.

2. Per-Module Breakdown — Latest Run (26442766019)

Module / Parallel Job	Pass Rate	Passed	Failed	Skip	Total	Duration	Health
SLD Module (71 TCs)	98.6%	70	1	0	71	15 min	Healthy
Work Order + Issue (234 TCs)	94.9%	222	12	0	234	111 min	Healthy
Dashboard + BugHunt (105 TCs)	91.8%	78	6	1	85	54 min	Healthy
Location + Task (135 TCs)	83.0%	112	23	0	135	66 min	Watch
Asset Parts 1-2 (69 TCs)	78.3%	54	15	0	69	67 min	Watch
Auth + Site + Connection (130 TCs)	54.7%	76	63	0	139	162 min	Critical
Asset Part 3 (76 TCs)	32.9%	25	51	0	76	65 min	Critical
Asset Part 4 (65 TCs)	24.6%	16	49	0	65	57 min	Critical
Asset Part 5 (76 TCs)	21.1%	16	60	0	76	43 min	Critical

3. Run Trajectory — Last 10 Successful CI Runs

DATE	FAILURE BAR (CAPPED AT 280)	PASSED	FAILED	SKIP	RUN ID
2026-04-27		935	13	0	25001241790
2026-04-28		959	11	0	25054293207
2026-05-01		910	39	1	25204867049
2026-05-04		944	5	1	25332204860
2026-05-08		907	42	1	25542085220
2026-05-15		940	10	0	25918658591
2026-05-18		942	8	0	26038756040
2026-05-22		599	279	72	26294314258
2026-05-25		749	201	0	26393022469
2026-05-26		669	280	1	26442766019

Trend: May 18 (run 26038756040) was the most stable window — 942 / 950 passed. May 22 onward shows degradation as the new web version landed; Asset modules took most of the impact. The 2026-05-25 run added 17 new module smoke tests covering Sales, Engineering, Compliance, and Audit modules.

4. Failure Analysis

4.1 Most recurring failures across 10 runs

TEST	TIMES FAILED	LIKELY CATEGORY
AuthenticationTestNG.testTC_SEC_02_LoginRateLimitAfterFailures	10 of 10	Real product security
BugHuntTestNG.testBUG16_SignInButtonDisabledStates	10 of 10	Regression watchdog
BugHuntWorkOrdersTestNG.testBUG015_MissingStatusColumn	7 of 10	Regression watchdog
BugHuntPagesTestNG.testBUG026_SLDsDuplicateDropdown	5 of 10	Regression watchdog
ConnectionTestNG.testSF_002_SearchInvalid	5 of 10	Test-infra / locator
ConnectionTestNG.testSF_003_ClearSearch	5 of 10	Test-infra / locator
AssetPart3TestNG.testGEN_EAD_09_EditManufacturer	4 of 10	Asset page-object regression

6. Recommended Next Actions

- Fix the shared Asset page-object locator.** Asset Parts 3/4/5 collapse together (32.9% / 24.6% / 21.1%) — pull the common error message across the 160 failed asset tests, identify the broken locator in `AssetPage.java` , fix it. Expected recovery: ~120-160 tests in one commit.
- Audit Auth + Site + Connection (54.7% pass).** 63 failures — investigate whether session/site-selection cascade is causing dependent test failures downstream.
- Deep-coverage build-out for new modules.** The 17 smoke tests added 2026-05-25 catch availability; CRUD coverage (Opportunities, Goals, Equipment Library) is still zero. Highest business risk: Sales pipeline.
- Lock down CI infrastructure.** Commit `43e8ed4` pinned all floating `@vN` action tags. Verified, no further infra-bounces expected on this workflow.
